**DSX-4TU
Rear View**

ADC's new DSX-3 migration modules are a simple way to seamlessly cap other DSX provider's lineups and migrate to ADC's DSX-3 solutions. As an industry leader, ADC's DSX-3 solutions offer superior performance, service, and support. Add to that our strategic pricing incentives and easy-to-use cross-reference tools, we ensure a simple transition requiring minimal service provider resources.

Our robust DSX jack design is constructed with mechanical support to ensure lifetime service, not merely a solder type connection on a printed circuit board. Add to this ADC's proven early "make-before-break" switching design. Make-before-break contacts ensure that high speed signals never go open or unterminated during in-service patching. DS3 signals are always terminated to a 75 ohm load preventing signal oscillation that can lead to bit-errors during patching. ADC's highly durable BNC is standard. Its solid cylinder design has a closed entry contact to prevent spring contact overstress. To ensure true 75 ohm impedance, we don't use Teflon insulators. ADC's sealed jacks have firewall protection preventing environmental contaminants from disturbing switch contacts.

Features and Benefits:

- Robust design using die cast jack technology
- Pre-loaded monitor access
- Early "make-before-break" switching design
- Sealed firewall jack design
- Contact wipe and spring force enhanced performance
- Unrivaled BNC design offers performance excellence
- NEBS compliant

DSX-4TU Type Migration Modules

Ordering Information

Description	Catalog Number
Midsized, BNC, 3-port, vertical-mount	DSX-4TU-MB3-V
Midsized, BNC, 6-port, vertical-mount	DSX-4TU-MB6-V
Midsized, BNC, 6-port, horizontal-mount	DSX-4TU-MB6-H
Standard size, 3-port	DSX-4TU-SB3
Standard size, 6-port	DSX-4TU-SB6
Standard size, 6-port, horizontal-mount	DSX-4TU-SB6-H
